

# Light Weight ERT Ballistic Shield – LW Level IIIA

The United Shield LW E.R.T shield is a new addition to our range of multi-functional shields. This shield has been designed in close collaboration with tactical operators, to satisfy the need for a shield which is light and versatile, while being strong and robust. The shield is ambidextrous, so that left and right handed operators can use the same shield quickly and without any need to change the handle positions. It is operator friendly when use in different tactical situations, operates well in stairwells and confined space clearing/assaults as well as dynamic entry and routine patrol. The integrated weapons mount provides for single handed operation, allowing operators to deploy their firearm. The shield has a solid tri-grip handle combined with three soft handles for ease of deploying the shields. The LW E.R.T. shield offers increased head coverage against other cut-out shields. The new LW version of this shield offers a 20% weight reduction from the standard version.

Shield comes standard with 4" x 10" viewport

## Armor Solution

United Shield uses high strength aramid achieving the NIJ level IIIA, meeting the NIJ 0108.01 testing standards.

## Performance

For the LW Level IIIA shield
