

The United Shield International BOA retention harness with Rapid Adjustment Dial is a stand-alone chinstrap to feature dial-adjustable fit that can be adjusted on the go. The Boa® Fit System provides the ability to adjust fit, stabilize the helmet when running and in prone position, as well as increase comfort while remaining lightweight and durable. This Harness system is compatible with multiple helmet styles and manufacturers.

The Boa® Fit System's patented technology delivers a secure fit in a matter of seconds. The micro-adjustable Boa dial allows for one-handed incremental adjustment to tighten and loosen, delivering a precise, effortless and custom fit on the go. This harness still offers the ability of having a quick release system to instantly loosen the harness around the crown of the head.

The USI BOA responds to the dynamic loading conditions of a modern combat helmet. It is capable of withstanding the additional weight of head borne accessories, reducing the need for accessories such as counterweights.

The USI BOA harness offers a warranty of 18 months on the Rapid adjustment dial and harness, while offering a lifetime warranty on the cabling within the harness.
