

Wireless LED Light Single Light 7000 Lumens

The United Shield Wireless LED is the first wireless LED shield light introduced into the market. With the use of low transmitting wireless signal, wires are no longer needed to penetrate or go around a shield. The light has one built in rechargeable lithium ion battery. The light features a single, 7000 Lumen LED light with 4 functional modes (Constant on, Momentary on, Constant turbo-strobe and Momentary Turbo-Strobe). With the use of an integrated battery, there is no longer a need for a rear battery pack. The light comes standard with a pressure pad and a remote controller. The pressure pad that can be placed on the handle to assist in ease of turning the light on and off.

Lights are able to be factory integrated or retro-fit to existing United Shield International shields.
