

UPT Ark TG Laser Cut Plate Carrier

The United Shield International UPT Ark TG Plate Carrier was developed to give the end user an Ultra Lightweight carrier option for use with rifle plates only. This carrier was developed based off our end user feedback and today's critical mission needs. With our unique "Y" internal vent system for cooling along with our high-performance cooling mesh in-conjunction with Body armor vent, the ARK TG offers a cooler temperature vest. The vest comes standard with dual Aspetto Buckles, TG laser cut cummerbund with Dual internal pockets and internal laser cut MOLLE for the addition of accessories. This unique drop down cummerbund gives more space for addition of product in the cummerbund. The ARK TG also utilizes our G-hook attachment system in the rear of the carrier to provide extra flexibility in sizing.
