

ExPro Shield LW III+

The ExPro Covert ballistic shield is designed specifically for executive protection and low vis operations. Available for Chevy, Ford and GMC SUV's. This shield is constructed using flat rifle rated ballistic panels, contained in a heavy-duty cover that can easily be installed against the rear of the back row seats. The ExPro ballistic panels are held in a heavy duty Cordura cover and is designed to be low profile as to not affect rear cargo area. Each ExPro model comes complete with 3 panels, Drivers side, passenger side and piece to overlap those sections to provide ballistic coverage over the seam. This tri-shield design allows for rear seats to be put up and down, in the case of carrying extra cargo. The shields are easily deployable and have the ability for custom handles and design on the carry bag.

Armor Solution

United Shield uses proprietary, market leading polyethylene (UHMWPE) meeting the NIJ 0108.01 testing standards.

Performance
