

Viper ICW

In-Conjunction Level III+ (RF2)

The Viper ICW insert plate is a level III+ (Rf2) polyethylene and ceramic plate tested in accordance to the ballistic threats of NIJ 0101.07 when worn in-conjunction with United Shield International certified level II or IIIA armor. This multi curve plates ergonomic design provides excellent protection against a range of high velocity threats. It is engineered to defeat select special threat ammunition while maintaining a thin, streamlined profile suitable for both tactical and patrol applications

The Viper plate is also tested as a Stand Alone Special Threat Plate, defeating the 5.56 and 7.62x39 projectiles without the need of level II or IIIA armor.

Armor Solution

United Shield International uses a proprietary Polyethylene based technology to achieve the In-Conjunction rifle performance when worn with certified level II or IIIA soft armor.
